

EMILY CUBEROS

Technical Project Management & Web Development Student

786-828-9949 | emcuberos@hotmail.com | Miramar, FL | [linkedin.com/in/emily-cuberos](https://www.linkedin.com/in/emily-cuberos) | emily-cuberos-portfolio.netlify.app

SUMMARY

Interdisciplinary Studies student (FIU) with an expertise focus in Project Management — coursework delivered through FIU's Information Systems program — and a formal Project Management minor. Detail-oriented and self-motivated, with a focus on process improvement and two years of architectural design-studio training — leading cross-functional teams through stakeholder interviews, feasibility analysis, and phased implementation planning — plus hands-on front-end development: proficient in HTML5, Tailwind CSS, and JavaScript through designing, building, and publishing several live web apps and sites, and trained in entity-relationship modeling, 3NF relational schema design, and Celonis process mining.

TECHNICAL SKILLS

Front-End Development: HTML5, Tailwind CSS, JavaScript (DOM manipulation, event-driven UI, client-side state)

Systems & Data: Entity-relationship modeling, relational schema design (3NF), data flow diagrams (DFD), business process mapping (BPMN), process improvement, Celonis process mining, Tableau, SQL

Software: Excel, PowerPoint, Word, Outlook, Teams, Google Workspace, Canva, AutoCAD, Rhino

PROJECTS

The Harlow Hotel & Resort — Guest Experience Booking Platform

ISM 4113, Systems Analysis & Design | Team of 5 | Summer 2026

- Independently designed and built the entire guest-facing interface in HTML5, Tailwind CSS, and vanilla JavaScript — real-time amenity and dining reservations, a loyalty-points checkout with live discount calculation, and persistent guest state.
- Coordinated interface design with the team's 14-table, 3NF relational schema and Level-0 data flow diagram supporting real-time double-booking prevention.
- Solely authored the business case — problem statement, options analysis, financial/risk analysis, and phased implementation plan — for a \$70K guest-reservation platform projected to net roughly \$50K per year.

Velvet Espresso Café — AI-Powered Order Processing Redesign

ISM 3153, Business Process Analysis | Team of 5, Project Lead | Summer 2026

- Independently designed and coded an ordering-system prototype (HTML5, Tailwind CSS, JavaScript) modeling a proposed AI voice-ordering flow, live cart, and operations dashboard.
- Mapped as-is/to-be process models from a 30-order peak-hour observation study (course simulation), isolating the rework loop responsible for a 13% order-error rate.
- Benchmarked proposed AI features against real deployments (Stord, Gojek) and defined the KPI set used to evaluate a phased rollout.

Architecture Studio Projects — Design Studios 1–4

FIU Master of Architecture, Accelerated Major | 2023–2025

- Managed multi-phase design projects end to end, presenting rationale to faculty critique panels at each phase (studio sample sheets available in portfolio site).

CERTIFICATIONS

[Celonis Foundations](#); [Use and Interpret Views](#); [Academic Process Mining Fundamentals](#); [Mastercourse in Process Intelligence & Enterprise AI](#) — Celonis Academy (2026)

[Project Management Foundations](#); [Everybody's Introduction to Tableau](#); [Hands-On Introduction: SQL](#) — LinkedIn Learning (2026)

FIU Global Career Accelerator (in progress, Fall 2026): Web Development (with Intel); AI-Powered JavaScript (with L'Oréal); AI Professional Skills (with OpenAI); Intercultural Skills (with UNESCO)

EDUCATION

Florida International University — B.A., Interdisciplinary Studies, Project Management Expertise Focus (FIU Information Systems) & Minor

Expected Graduation: December 2026 | Cumulative GPA 3.74, Magna Cum Laude track | Dean's List, 5 terms

Completed two years of FIU's Master of Architecture — Accelerated Major (2023–2025); transitioned to current program

Divine Savior Academy — High School Diploma, 2023 | GPA 4.0, Highest Honor Roll

ADDITIONAL

Languages: English (native), Spanish (fluent) | Tutoring & classroom support for special needs students, 2023–2024
