EMILY CUBEROS

Project Management Student — Process Improvement, Architecture & Systems Background

emcuberos@hotmail.com | Miramar, FL | linkedin.com/in/emily-cuberos | **emily-cuberos-portfolio.netlify.app**

SUMMARY

Interdisciplinary Studies student (FIU) with an expertise focus in Project Management — coursework delivered through FIU's Information Systems program — and a formal Project Management minor. Detail-oriented and self-motivated, with a focus on process improvement and two years of architectural design-studio training — leading cross-functional teams through stakeholder interviews, feasibility analysis, and phased implementation planning.

CORE SKILLS

Project Coordination: Stakeholder analysis & mapping, requirements gathering, scope/schedule tracking, phased implementation planning

Analysis: Financial & feasibility analysis, risk mitigation, process mapping & improvement, process mining (Celonis), Tableau, SQL

Design: Architectural drafting (AutoCAD, Rhino), design studio documentation, presentation design

Software: Excel, PowerPoint, Word, Outlook, Teams, Google Workspace, Canva

PROJECTS

The Harlow Hotel & Resort — Guest Experience Booking Platform

ISM 4113, Systems Analysis & Design | Team of 5 | Summer 2026

- Solely authored the business case for a 5-person systems-design team — problem statement, options analysis, financial/risk analysis, and phased implementation plan — for a $70K platform projected to net roughly $50K per year.
- Independently designed the full guest interface and built the working web application, demonstrating the proposed booking, dining, and loyalty-rewards experience (live in portfolio site).
- Aligned interface and business-case work with the team's data architecture and stakeholder-interview findings (course simulation).

Velvet Espresso Café — AI-Powered Process Improvement

ISM 3153, Business Process Analysis | Team of 5, Project Lead | Summer 2026

- Led a five-person course simulation of a fictional café: designed realistic process problems (a rework loop causing order errors and customer walk-offs), mapped the as-is process, and developed an improved to-be workflow.
- Defined a phased AI-implementation roadmap and KPI targets (processing time, accuracy, CSAT) for course stakeholders.
- Independently developed a working interface prototype to visualize the proposed workflow for stakeholders (live in portfolio site).

Architecture Studio Projects — Design Studios 1–4

FIU Master of Architecture, Accelerated Major | 2023–2025

- Managed multi-phase design projects end to end, presenting rationale to faculty critique panels at each phase (studio sample sheets available in portfolio site).

CERTIFICATIONS

Celonis Foundations; Use and Interpret Views; Academic Process Mining Fundamentals; Mastercourse in Process Intelligence & Enterprise AI — Celonis Academy (2026)

Project Management Foundations; Everybody's Introduction to Tableau; Hands-On Introduction: SQL — LinkedIn Learning (2026)

FIU Global Career Accelerator (in progress, Fall 2026): Intercultural Skills (with UNESCO); AI Professional Skills (with OpenAI); Web Development (with Intel); AI-Powered JavaScript (with L'Oréal)

EDUCATION

Florida International University — B.A., Interdisciplinary Studies, Project Management Expertise Focus (FIU Information Systems) & Minor

Expected Graduation: December 2026 | Cumulative GPA 3.74, Magna Cum Laude track | Dean's List, 5 terms

Completed two years of FIU's Master of Architecture — Accelerated Major (2023–2025); transitioned to current program

Divine Savior Academy — High School Diploma, 2023 | GPA 4.0, Highest Honor Roll

ADDITIONAL

Languages: English (native), Spanish (fluent) | Tutoring & classroom support for special needs students, 2023–2024
